SUMMARY

Web Developer with a passion for front-end development. Proven ability integrating user experience with dynamic displays for better information presentation. A charismatic problem-solver who enjoys learning new technologies and taking on challenges in a team environment to maximize efficiency.

PROFICIENT SKILLS: HTML, CSS, JavaScript, React

EXPERIENCE USING: jQuery, Java, Bootstrap, Express.js, Node.js, Database Theory (MySQL, Mogo/Mongoose), Command Line, Git, GitHub, APIs, JSON, AJAX, Firebase, Heroku, Handlebars

PROJECTS

Journey Through the Solar System | github.com/rtjae1/SolarSystem | rtjae1.github.io/SolarSystem | **Project Manager**

- The user can interact with the sun, all eight planets, and Pluto in our solar system. Clicking on one of the celestial bodies will display a modal with relevant information about each planet. Using NASA'S picture of the day API, displays its image and detailed caption. The user can also enter their name and age to find out how old they would be (in Earth years) on every planet.
- **Tools/Languages:** HTML, CSS, JavaScript, Wolfram Alpha API, NASA API, Chart.js, Firebase

Eat Da Burger | github.com/rtjae1/burger | infinite-brushlands-19708.herokuapp.com | **Full-Stack Developer**

- An application that allows the user to design burger menu items for order. The new burger then goes into a "menu." Once the burger is "eaten" it is removed from the "menu."
- **Tools/Languages:** HTML, CSS, JavaScript, GitHub, Heroku, Node, Express, Handlebars

Meal Plan | github.com/rtjae1/ingredientLove2 | mealplan5.firebaseio.com | **Full-Stack Developer**

- Allows the user to create meal plans for a period of time (day/week/month/etc.). There are editing tools as well as notifications for who entered the meal and when.
- **Tools/Languages:** HTML, CSS, JavaScript, GitHub, Heroku, Node, Express, React, Firebase
